

NAME : JULIA NURFADHILAH BINTI MOHAMAD FAUZI  
MATRIC NO : 208256

### QUESTION 1

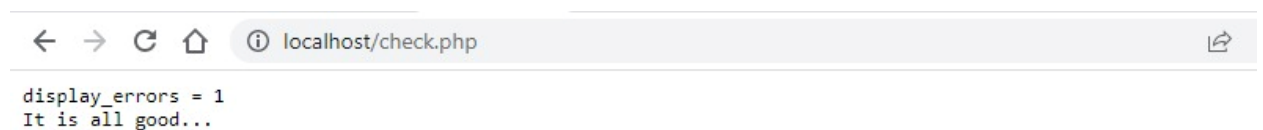

1. Image of your application showing the URL bar and the rest of the output.

2. Image of your application showing the URL bar and output of fail.php

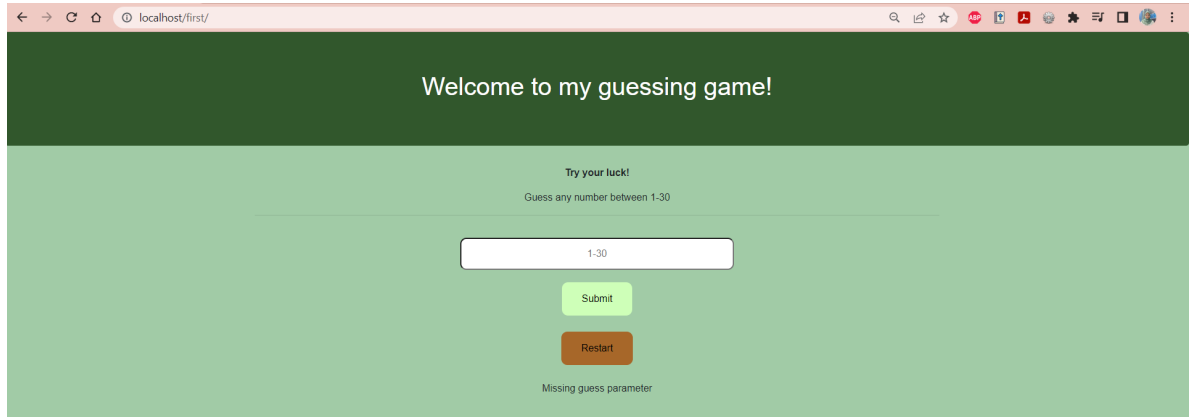

3. Image of your application showing the URL bar output of check.php

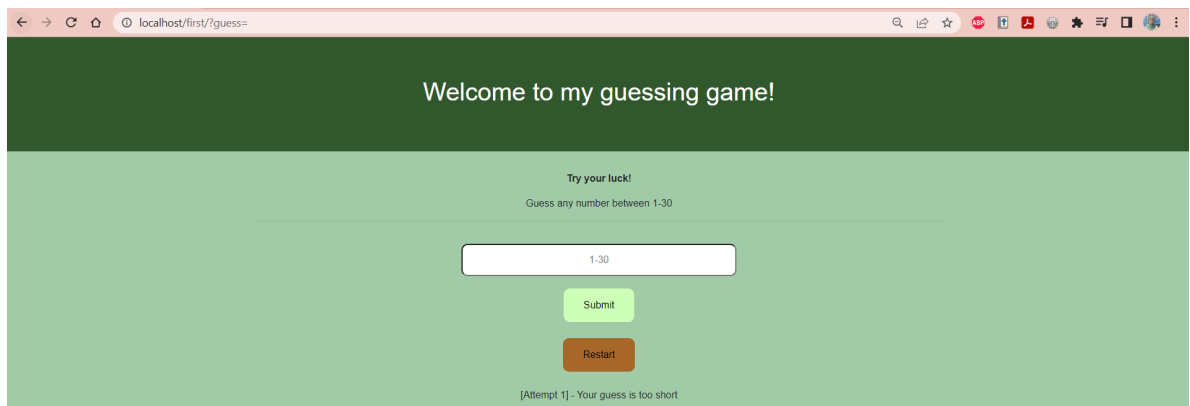

4. Source code of your index.php  
<https://github.com/juliaxy0/SSE3150/blob/main/LAB3/Q1/index.php>

## QUESTION 2

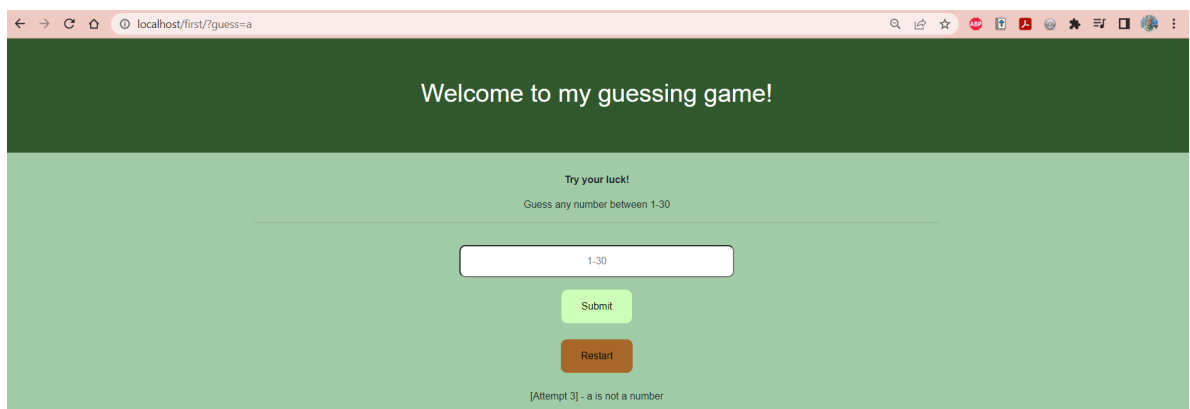

1. call your program with no parameters at all and your program should say, "Missing guess parameter".

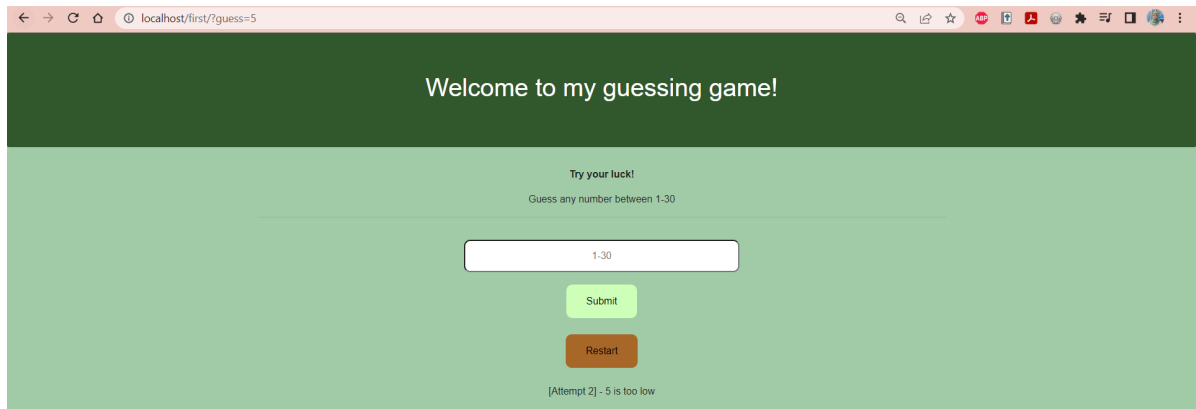

2. call your program with the guess parameter without a value and your program should say, "Your guess is too short".

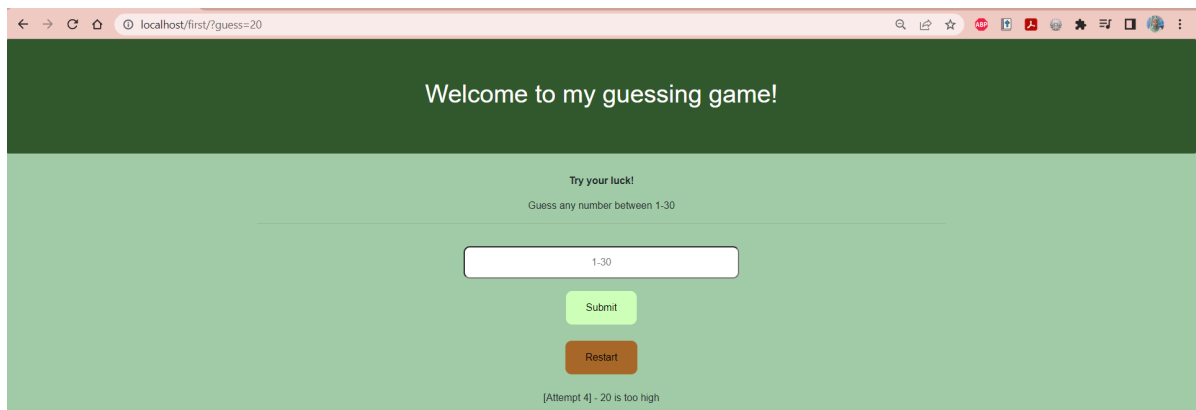

3. call your code with a non-numeric value and your code should say, "Your guess is not a number".

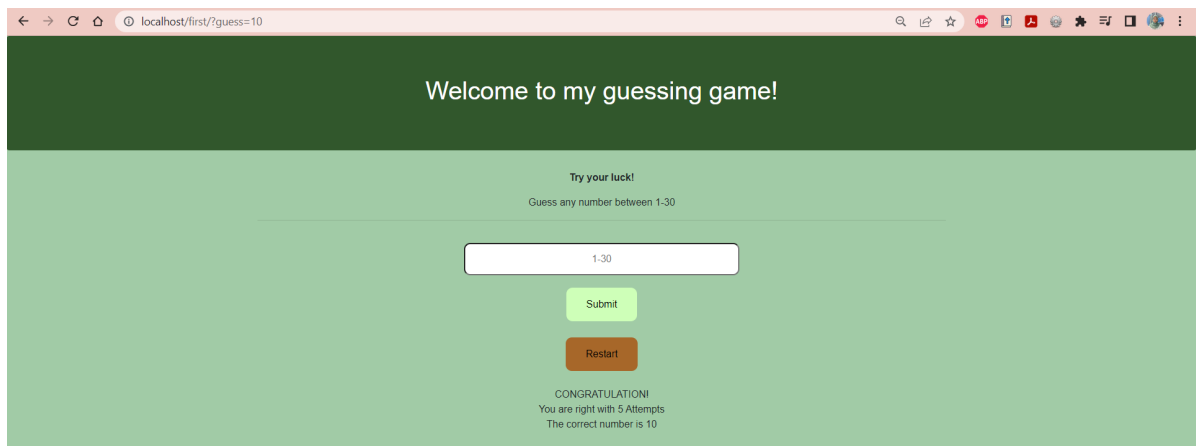

- call your code with a low guess and your code should say, "# Attempt, Your guess is too low".

- call your code with a too high guess and your code should say, "# Attempt, Your guess is too high".

- call your code with the right value and your code should say, "Congratulations - You are right with #Attempt".
